

Project Demo Planning

Date	06 July 2026
Team ID	
Project Name	Voice Based Concept Understanding Analyser (VBCUA)
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain why assessing spoken concept understanding is hard to do manually and how VBCUA automates it.	2	Jagadesh
2	Solution Architecture Overview	Walk through the system design: Node/Express proxy, FastAPI backend, Whisper, SBERT and Librosa modules.	2	Jagadesh
3	Live Demo: Audio Upload & Transcription	Upload/record a sample explanation and show real-time Whisper transcription.	3	Karthik
4	Semantic Similarity & Scoring Breakdown	Show the semantic similarity score against the reference concept and the keyword gap analysis.	2	Karthik
5	Fluency Analysis & Visualisations	Present pause, filler word, pitch and energy metrics along with the waveform and spectrogram charts.	3	Dada Khalandar
6	PDF Report, UI Walkthrough & Q&A	Show the downloadable PDF report and full frontend UI, then open the floor for questions.	3	Hasini

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Jagadesh introduces the problem: manually grading spoken concept explanations is slow and inconsistent.
2	Solution Overview	High-level architecture walkthrough covering the frontend, Node proxy, FastAPI backend, and AI modules (Whisper, SBERT, Librosa).
3	Live Feature Demonstration	End-to-end run: upload audio, transcription, semantic + fluency scoring, charts, and PDF report download.
4	Q&A Session	Open floor for questions; each member fields questions related to the module they built.
