

Problem-Solution Fit

Date	15 July 2026
Team ID	
Project Title	Voice Based Concept Understanding Analyser
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

1. CUSTOMER SEGMENT(S) [CS] Students, learners, and educators who want to evaluate conceptual understanding through spoken explanations.	6. CUSTOMER LIMITATIONS [CL] Limited access to advanced evaluation tools; may rely on mobile or low-end devices; budget constraints for premium AI tools.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Existing tools focus on written assessments; limited or no support for spoken concept evaluation. Pros: Easy to use. Cons: Lack of verbal analysis and personalized feedback.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Students struggle to assess their understanding verbally; educators spend time manually evaluating answers. Occurs frequently during exam preparation and concept learning.	9. PROBLEM ROOT / CAUSE [RC] Lack of automated tools for speech-based conceptual evaluation; dependence on subjective human feedback.	7. BEHAVIOR + ITS INTENSITY [BE] Learners repeatedly record explanations or seek feedback from peers; moderate to high intensity during exam periods.

3. TRIGGERS TO ACT [TR]

Need for instant feedback, self-assessment, and confidence building before exams or interviews.

4. EMOTIONS

Before: Confused, anxious, unsure about conceptual clarity.

After: Confident, motivated, and aware of strengths and weaknesses.

10. YOUR SOLUTION [SL]

Voice-based AI system that converts speech to text, compares with reference answers, and provides similarity scores and feedback reports.

8. CHANNELS OF BEHAVIOR [CH]

Online: Web app, mobile app.

Offline: Classroom demonstrations, teacher-led evaluations.
