

Customer Journey Map

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions	Records or uploads audio of concept explanation	System converts speech to text and compares with reference answer	User receives similarity score, feedback, and report
What does the customer do?	Speak about a concept (e.g., Machine Learning)	Waits for transcription and analysis	Reviews feedback and suggested improvements
Touchpoint	Recording interface / Upload option	Backend speech-to-text + NLP engine	Feedback dashboard / Report download
What part of the service do they interact with?	Audio input module	Speech-to-text + similarity scoring module	Feedback & reporting module
Customer Thought	"I hope my explanation is captured correctly."	"Is my answer close to the reference?"	"Now I know what I did well and what to improve."

Customer Feeling	• Curious, slightly anxious	• Impatient but hopeful	• Relieved, motivated, confident

Date	07 july 2026
Team ID	
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	2 Marks

Customer Journey Map

Who is in the lead on this?	• Frontend team (UI/UX for recording/upload)	• Backend/NLP team (speech-to-text + similarity scoring)	• Reporting & visualization team
Opportunities	• Simplify recording/upload process	• Improve accuracy of transcription & semantic similarity	• Provide personalized learning resources
How can we improve this stage?	• Add multi-format audio support • Provide clear instructions	• Use advanced NLP models (BERT, Sentence Transformers) • Reduce processing time	• Highlight missing concepts • Offer tailored study materials
